

	Compliantz is not	Compliantz is
1	A technical vulnerability assessment and management product	A security and compliance risk assessment product focused on people, processes, policies and procedures
2	One of the many SOX or HIPAA assessment tools addressing compliance in silos	Able to assess multiple regulations for compliance including: Sarbanes-Oxley Act (SOX) HIPAA Security GLB Act California SB-1386 NIST 800-53 FACT Act Visa CISP/PCI Data Security ISO/IEC 17799:2000 ISO/IEC 27002:2005 ISO/IEC 27001:2005
3	Meant to be used as an assurance product	A diagnostic tool - used to assess against internationally accepted best practices and uncover weaknesses in Information Security and Regulatory Compliance
4	Another workflow program for tracking compliance activities	A security and compliance assessment product with workflow capabilities, to identify weaknesses in information security and regulatory compliance <b>before</b> an audit is done.
5	A simple Excel spreadsheet analysis	An automated, intelligent control self-assessment program, available in an ASP model, for scalability and efficiency
6	Only available as a desktop standalone installation	Available under 2 different licensing arrangements: – Subscription to Web Portal – Non-Hosted (Client Hosted application)
7	Another IT tool, with little of no tangible Return on Investment (ROI)	Focused on the executive level of an organization and provides a repeatable process for measuring an organization's Information security and Regulatory compliance posture, over time and across multiple business units and geographical locations. Non-compliance is identified, allowing remedial action to be taken <b>before</b> an audit is done, resulting in substantial savings in audit costs.
8	Just another one of many products in this space	One of only a handful of products with this capability. Based on years of industry experience by international recognized subject matter experts in the area of information security and regulatory compliance
9	A tool that cannot address global corporate requirements	Customizable to address country specific regulations, therefore being a true global assessment application
10	Just a question and answer review for compliance	A full compliance management application; consisting of a knowledge base, assessment module, reference library and reporting engine
